

# Small business skills

THE Corrimal-based IT business Cleverlink is running free e-business courses over the next two months and is also hosting a small-business expo on March 3 at the Wollongong Golf Club.

The free Fast Track Your e-business Growth courses are open to enterprises that may not already have a website. The courses show why e-business is more than having a web presence, by identifying ways to attract new business via the internet.

The free expo on March 3 will showcase some of the region's interesting small and home-based businesses and provide the opportunity to learn, explore and network.

The expo is part of the Australian Government-funded Small Business Online Program. Further information at the [www.cleverlinktraining.com.au](http://www.cleverlinktraining.com.au) web site.
